Emergency Services

Schaumburg Fire Station #51	950 W Schaumburg Road, Schaumburg, IL 60194	Emergency: 911
--------------------------------	---	----------------

Purpose and Rationale

Emergencies can occur without warning during athletic events, making swift and effective action critical to ensuring the health and safety of athletes. A well-developed and clearly communicated Emergency Action Plan (EAP) provides a structured approach to managing emergency and life-threatening situations, enabling prompt, coordinated care when it is needed most.

Athletic organizations bear the responsibility of establishing an emergency plan that can be immediately activated. This plan should uphold the highest standards of health care and safety for all participants. Because injuries may occur at any time and during any activity, it is essential that the sports medicine team be fully prepared. Effective preparation includes:

- Developing and rehearsing a comprehensive emergency action plan
- Ensuring appropriate medical coverage during practices and events
- Maintaining accessible and functioning emergency equipment and supplies
- Utilizing qualified emergency medical personnel
- Pursuing ongoing education and training in emergency response

While proactive measures—such as pre-participation physical exams, safe training practices, and adequate event supervision—can reduce the likelihood of serious incidents, the inherent risks of athletic participation cannot be eliminated entirely. Through diligent planning and readiness, the sports medicine team can provide timely, effective care and manage emergencies with confidence and professionalism.

Components of the Emergency Action Plan

1. Emergency Personnel
2. Formation and Roles of the Emergency Team
3. Activating EMS
4. Emergency Equipment
5. Emergency Transportation
6. Non-Medical Emergencies
7. Venue Directions (with map)
8. Conclusion
9. Individual Venue Emergency Action Plans

Emergency Personnel

During most athletic practices or competitions, the initial responder to an emergency is typically a member of the sports medicine team—most commonly a Certified Athletic Trainer (ATC). The level and type of medical coverage can vary significantly depending on several factors, including the sport or activity involved, the environment in which it occurs, and whether it is a practice session or a formal competition.

In some cases, particularly when athletic training staff are not directly on-site or the setting is more remote, the first responder may be a coach, administrator, or other school personnel trained in emergency procedures. Regardless of who the initial responder is, all staff involved in athletics should be trained in CPR, familiar with the Emergency Action Plan (EAP), and prepared to activate it appropriately to ensure rapid and effective care.

Formation and Roles of the Emergency Team

An effective Emergency Action Plan (EAP) is incomplete without the formation of a coordinated and well-trained emergency response team. This team may include a range of personnel such as physicians, emergency medical technicians (EMTs), certified athletic trainers (ATCs), administrators, coaches, team managers, and in some cases, bystanders. The specific composition and responsibilities of the emergency team may vary based on factors such as the number of available responders, the layout and access points of the athletic venue, and the preferences or protocols established by the sports medicine staff.

Regardless of the personnel involved, there are **four essential roles** within every emergency response scenario:

1. **Scene Safety and Immediate Care of the Athlete**

The highest priority is to ensure the safety of the environment and to provide immediate, appropriate care to the injured individual. This care should be administered by the most qualified medical professional on-site. Individuals with less training or lower credentials should defer to those with more advanced emergency care expertise.

2. **Activation of Emergency Medical Services (EMS)**

If emergency transportation is not already on-site, EMS should be activated without delay once the situation is recognized as an emergency or life-threatening condition. Time is a critical factor in these circumstances. Any team member may make the call, but ideally, this responsibility should fall to a calm, composed individual who communicates clearly over the phone and is familiar with the venue's exact address and access points.

3. **Retrieval of Emergency Equipment**

The individual tasked with retrieving emergency equipment should be familiar with the type, location, and use of the items required (e.g., AED, spine board, splints, oxygen). This role can be filled by any trained team member and should be performed swiftly and efficiently.

4. **Guiding EMS to the Scene**

One member of the emergency team should be designated to meet EMS personnel upon their arrival and guide them directly to the injured athlete. This person should have access to any necessary keys for gates, doors, or other barriers that could delay EMS entry. Administrators, coaches, or team managers often serve effectively in this role.

Clearly defining these roles in advance and rehearsing them as part of regular emergency drills will enhance preparedness and ensure a prompt, organized, and effective response during actual emergencies.

Activating EMS

Dial 9-1-1 Immediately

When calling 9-1-1, be prepared to calmly and clearly provide the following information to the dispatcher:

- **Your Name, Address, and Phone Number**

Identify yourself and provide a call-back number in case the dispatcher needs more information.

- **Nature of the Emergency**

Specify whether the situation is **medical** or **non-medical**, and describe the type of emergency (e.g., head injury, cardiac arrest, seizure, etc.).

- **Number of Individuals Injured**

Indicate how many athletes or persons are involved.

- **Condition of the Injured Individual(s)**

Include critical details such as:

- Breathing or not breathing
- Presence or absence of pulse
- Bleeding status
- Level of consciousness

- **First Aid or Emergency Care Already Provided**

Describe any immediate care already initiated, such as:

- CPR
- Rescue breathing
- Bleeding control
- AED use

- **Exact Location and Directions to the Scene**

Provide specific details to help EMS arrive quickly, including:

- Venue name
- Field or court number
- Nearest entrance
- Gate or door access (if any)

(Refer to individual venue EAPs for more site-specific information.)

- **Any Additional Information Requested**

Stay on the line until the dispatcher tells you to hang up, and be prepared to answer further questions.

Emergency Equipment

All necessary emergency equipment should be at the site and quickly accessible. Personnel should be familiar with the function and operation of each type of emergency equipment. Equipment should be in good operating condition, and personnel must be trained in advance to use it properly. All equipment will be checked on an annual basis, or as deemed necessary by the sports medicine staff. Emergency equipment available should be appropriate for the level of training for the emergency medical providers.

It is important to know the proper way to care for and store the equipment as well. Equipment should be stored in a clean and environmentally controlled area. It should be readily available when emergency situations arise.

Emergency Transportation

Emphasis is placed on having an ambulance on site at high-risk sporting events. EMS response time is additionally factored in when determining on site ambulance coverage. The athletic department coordinates on site ambulances for competition in football. Ambulances may be coordinated on site for other special events/sports such as for conference tournaments and postseason events that are hosted. Consideration is given to the capabilities of transportation service available (i.e. basic life support and advanced life support) and the equipment and level of trained personnel on board the ambulance. In the event that an ambulance is on site, there should be a designated location with rapid access to the site and a cleared route for entering/exiting the venue.

In the medical emergency evaluation, the primary survey assists the emergency care provider in identifying emergencies requiring critical intervention and in determining transport decisions. In an emergency situation, the athlete should be transported by ambulance, where the necessary staff and equipment is available to deliver appropriate medical care. Emergency care providers should refrain from transporting unstable athletes in inappropriate vehicles. Care must be taken to ensure that the activity areas are supervised should the emergency care provider leave the site in transporting the athlete. Any emergency situations where there is impairment in level of consciousness (LOC), airway, breathing, or circulation (ABC) or there is neurovascular compromise should be considered a “load and go” situation and emphasis placed on rapid evaluation, treatment and transportation.

Non-Medical Emergencies

For the non-medical emergencies (fire, bomb threats, violent or criminal behavior, etc.) refer to the school emergency closing information page and follow instructions.

- <https://adc.d211.org/Page/4735>
- District 211 Announcement Hotline (847)755-6635

Venue Directions (with Map)

When activating EMS for incidents occurring at Schaumburg High School athletic facilities, use the directions below to guide emergency responders to the correct location. Entry points vary based on venue; refer to the specific **Venue Emergency Action Plan (EAP)** for further details.

From the East

- Travel **west on Schaumburg Road**
- The school entrance is located **just west of Salem Drive**, on the **north side** of Schaumburg Road
- **Use the east or west entrance** depending on the location of the emergency (see venue-specific EAP)

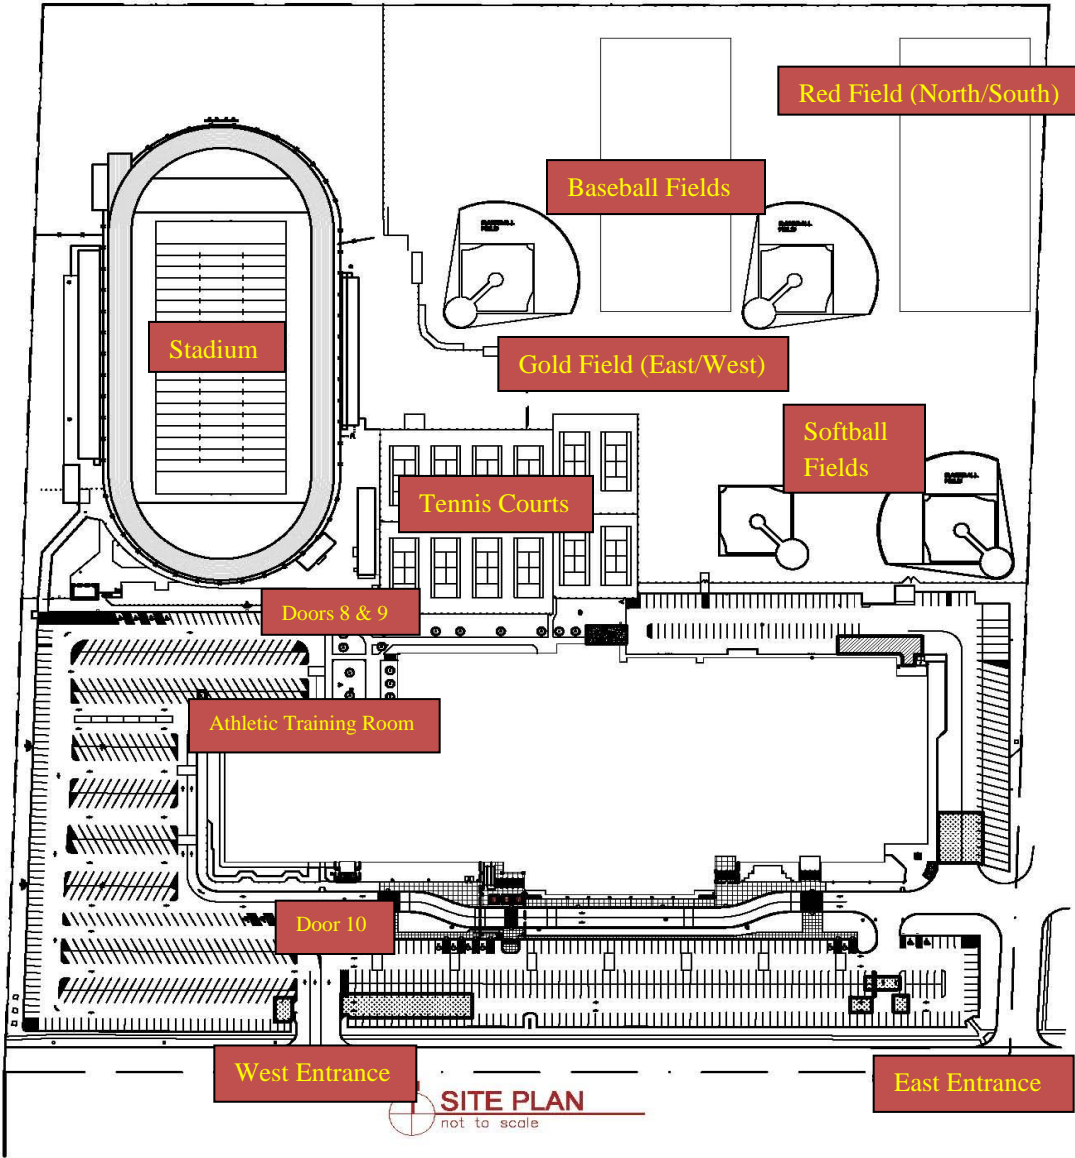

From the West

- Travel **east on Schaumburg Road**
- The school entrance is located **just east of Braintree Drive**, on the **north side** of Schaumburg Road
- **Use the east or west entrance** depending on the location of the emergency (see venue-specific EAP)

Conclusion

The importance of being properly prepared when athletic emergencies arise cannot be stressed enough. An athlete's survival may hinge on how well trained and prepared athletic healthcare providers are. It is prudent to invest athletic department "ownership" in the emergency plan by involving the athletic administration and sport coaches as well as sports medicine personnel. The Emergency plan should be reviewed at least once a year with all athletic personnel. Through development and implementation of the emergency plan, Schaumburg High School helps ensure that the athlete will have the best care provided when an emergency situation does arise.

Schaumburg High School

Emergency Action Plan Athletic Training Room (ATR)

Emergency Personnel

A certified athletic trainer is on-site for all athletic events and scheduled practices.

Emergency Communication

Hand held radios will be used to communicate between all venues, administration on site, and the athletic training room during events. Below are contacts for phone use during practices.

Athletic Training Room	(847)755-4790
------------------------	---------------

Emergency Equipment

A First Aid kit and supplies can be found with each athletic trainer on site. Additional emergency equipment can be found in the ATR.

AED Location

An AED is located in the hallway east of the ATR on the north wall.

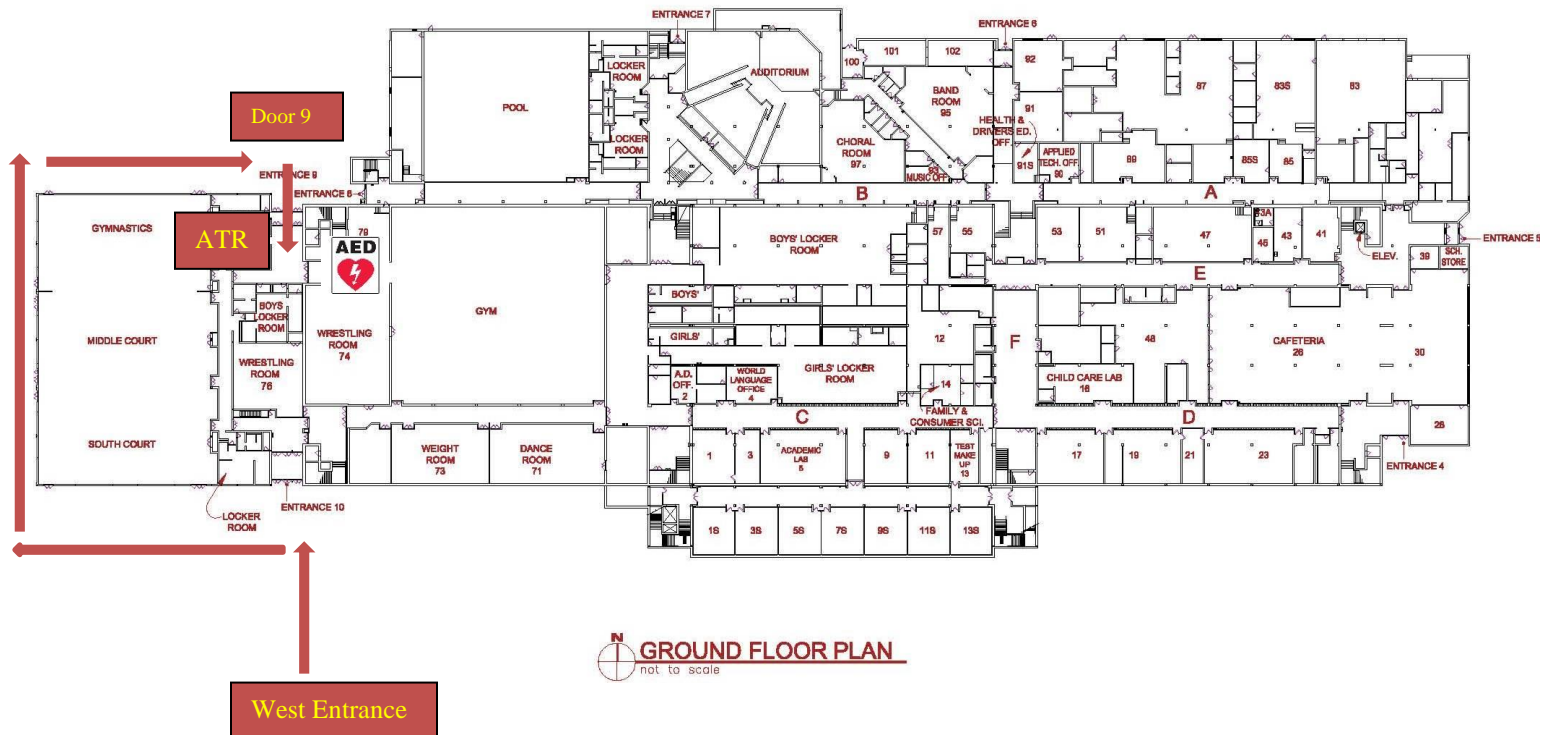

Roles of the First Responder

1. Immediate care of injured or ill student-athlete.
2. Activation of emergency medical services (EMS)
 - Call 9-1-1
3. Emergency equipment retrieval

4. Direct EMS to scene
 - a. Open appropriate doors/gates
 - b. Designate individual to “flag down” EMS and direct to scene
 - c. Scene control: Limit scene to first aid providers and move bystanders away from area

Map

Schaumburg High School

Safety Locations

In the event of severe weather (lightning/thunderstorms/tornado) athletes will be moved into the nearest locker room. In the event of a fire or bomb threat, the athletes will evacuate the building and move to the athletics parking lot on the southwest side of campus. Coaches will be responsible for ensuring that all players are accounted for. In the event of a lock down, athletes will report to their locker rooms until the all clear signal has been given.

Emergency Action Plan Stadium

Emergency Personnel

A certified athletic trainer is on-site for all athletic events and scheduled practices.

Emergency Communication

Hand held radios will be used to communicate between the stadium, administration on site, and the athletic training room during events. Below are contacts for phone use during practices.

Athletic Training Room	(847)755-4790
------------------------	---------------

Emergency Equipment

A First Aid kit and supplies can be found with each athletic trainer on site. Additional emergency equipment can be found on the sideline during events or in the athletic training room.

AED Locations

AEDs are located on the concession stand next to the west stands and also on the concession next to the east stands.

East Stands

West Stands

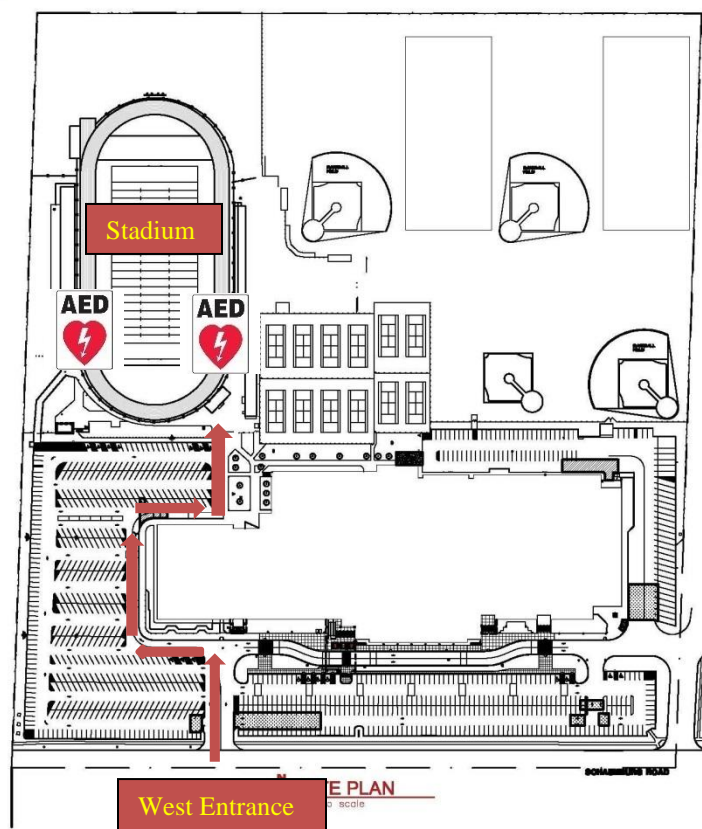

Roles of the First Responder

5. Immediate care of injured or ill student-athlete.
6. Activation of emergency medical services (EMS)
 - Call 9-1-1
7. Emergency equipment retrieval
8. Direct EMS to scene
 - a. Open appropriate doors/gates
 - b. Designate individual to “flag down” EMS and direct to scene
 - c. Scene control: Limit scene to first aid providers and move bystanders away from area

Map

Schaumburg High School

Safety Locations

In the event of severe weather (lightning/thunderstorms/tornado) athletes will be moved into the school building and designated to an area within the building by the administrator on site. In the event of a fire or bomb threat, the athletes will evacuate the field and move to the athletics parking lot on the west side of campus. Coaches will be responsible for ensuring that all players are accounted for. In the event of a lock down, athletes will report to their locker rooms, or exit campus as deemed appropriate by the administrator on site until the all clear signal has been given.

Emergency Action Plan Red Field (North/South)

Emergency Personnel

A certified athletic trainer is on-site for all athletic events and scheduled practices.

Emergency Communication

Hand held radios will be used to communicate between the field, administration on site, and the athletic training room during events. Below are contacts for phone use during practices.

Athletic Training Room	(847)755-4790
------------------------	---------------

Emergency Equipment

A First Aid kit and supplies can be found with each athletic trainer on site. Additional emergency equipment can be found on the sideline during events or in the athletic training room.

AED Location

An AED is located on the south softball dugout wall.

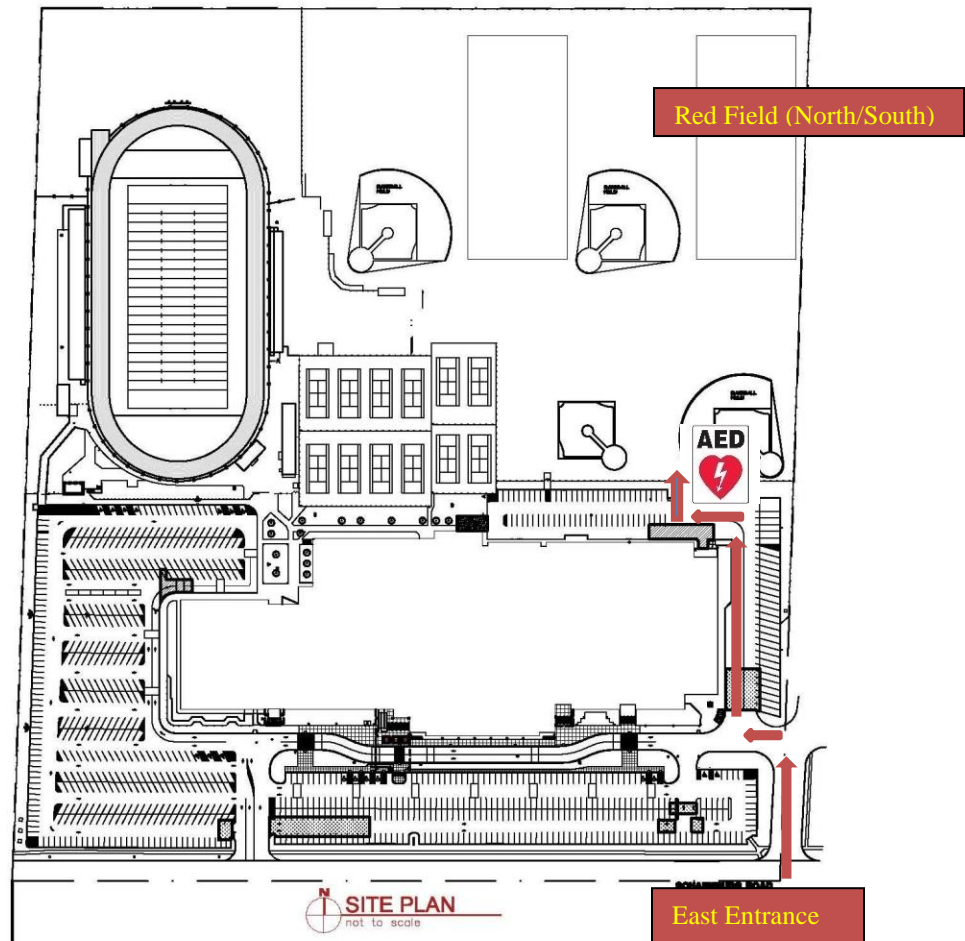

Roles of the First Responder

9. Immediate care of injured or ill student-athlete.
10. Activation of emergency medical services (EMS)
 - Call 9-1-1
11. Emergency equipment retrieval
12. Direct EMS to scene
 - a. Open appropriate doors/gates
 - b. Designate individual to “flag down” EMS and direct to scene
 - c. Scene control: Limit scene to first aid providers and move bystanders away from area

In the event of a fire or bomb threat, the athletes will evacuate the building and move to the athletics parking lot on the southwest side of campus. Coaches will be responsible for ensuring that all players are accounted for. In the event of a lock down, athletes will report to their locker rooms until the all clear signal has been given.

Emergency Action Plan Hoover Park

Address

301 N Springinsguth Rd, Schaumburg, IL 60194

Emergency Personnel

A coach will be the only emergency personnel when practices take place off-site. All coaches are required to be CPR/AED trained.

Emergency Communication

Cell phone use should be used when practices are taking place off-site. Below are contact numbers to contact SHS athletic trainers.

Athletic Training Room	(847)755-4790
------------------------	---------------

Emergency Equipment

A First Aid kit and supplies are available and can be brought by a coach or team manager.

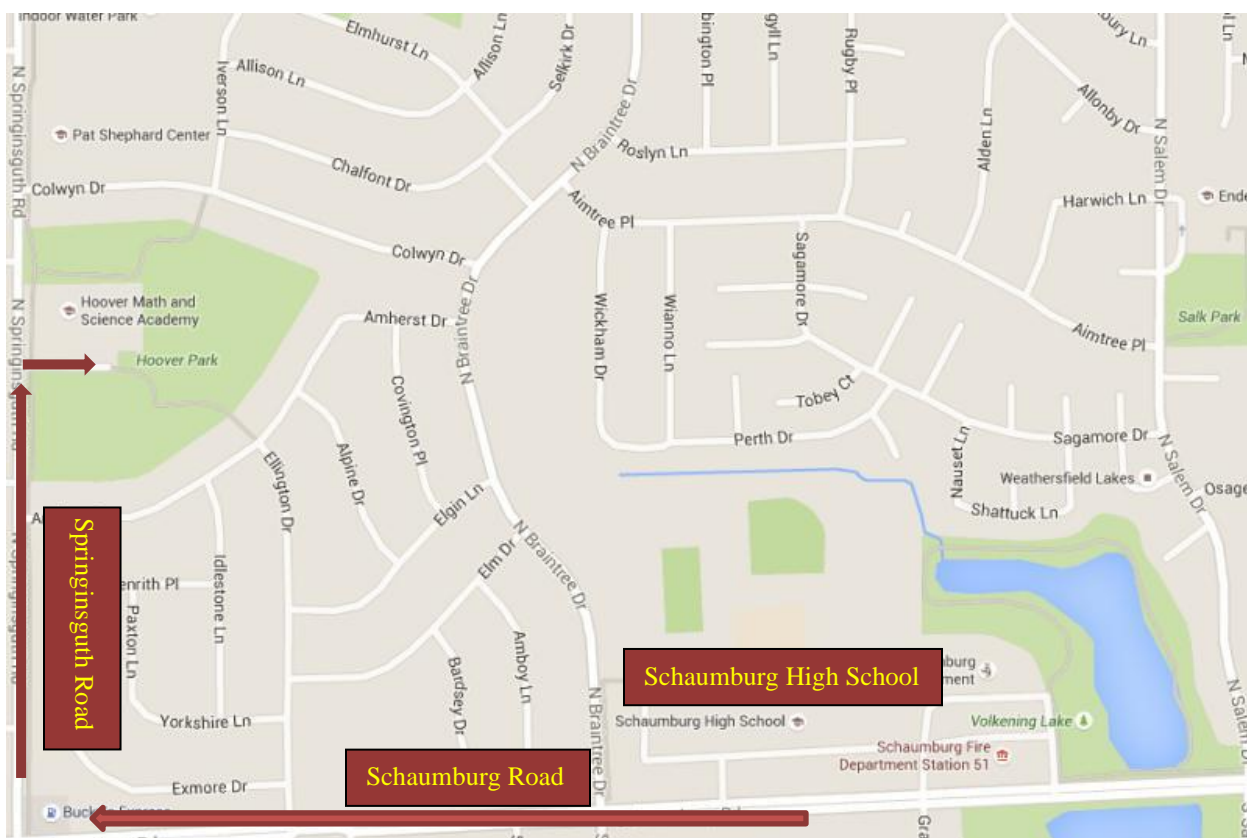

AED Location

There is no AED located at Hoover Park. An AED can be made available for coaches to bring with them.

Roles of the First Responder

- 49. Immediate care of injured or ill student-athlete.
- 50. Activation of emergency medical services (EMS)
 - Call 9-1-1
- 51. Emergency equipment retrieval
- 52. Direct EMS to scene
 - a. Open appropriate doors/gates
 - b. Designate individual to “flag down” EMS and direct to scene
 - c. Scene control: Limit scene to first aid providers and move bystanders away from area

Map

Safety Locations

In the event of severe weather (lightning/thunderstorms/tornado) athletes will be removed from the practice field and relocated to the nearest shelter. It is the responsibility of coaches to ensure that all athletes have available rides home or back to the school. Coaches will be responsible for ensuring that all players are accounted for.

Emergency Action Plan Olympic Park

Address

1675 Old Schaumburg Rd, Schaumburg, IL 60173

Emergency Personnel

Athletic trainers will not be present for practices at Olympic Park; however, they can be reached at the Athletic Training Room number if needed.

Emergency Communication

Cell phone use should be used when practices are taking place off-site. Below are contact numbers for the SHS athletic trainers.

Athletic Training Room	(847)755-4790
------------------------	---------------

Safety Locations

In the event of severe weather (lightning/thunderstorms/tornado) athletes will be removed from the practice field and relocated to the nearest shelter. It is the responsibility of coaches to ensure that all athletes have available rides home or back to the school. Coaches will be responsible for ensuring that all players are accounted for.
